With Primary Open-Angle Glaucoma With and Without Diabetes Mellitus.
Optic Nerve Head Deformation in Glaucoma: The Temporal Relationship between Optic Nerve Head Surface Depression and Retinal Nerve Fiber Layer Thinning.

The effect of myopic optic disc tilt on measurement of spectral-domain optical coherence tomography parameters. Glaucoma-induced optic disc morphometric changes and glaucoma diagnostic ability of Heidelberg Retina Tomograph II in highly myopic eyes. The ISNT rule in glaucoma: revisiting with spectral domain optical coherence tomography. Application of the ISNT Rule to Neuretinal Rim Thickness Determined Using Cirrus HD Optical Coherence Tomography.

Glaucoma-induced optic disc morphometric changes and glaucoma diagnostic ability of Heidelberg Retina Tomograph II in highly myopic eyes. The ISNT rule in glaucoma: revisiting with spectral domain optical coherence tomography. Application of the ISNT Rule to Neuretinal Rim Thickness Determined Using Cirrus HD Optical Coherence Tomography.

The effect of myopic optic disc tilt on measurement of spectral-domain optical coherence tomography parameters. Glaucoma-induced optic disc morphometric changes and glaucoma diagnostic ability of Heidelberg Retina Tomograph II in highly myopic eyes. The ISNT rule in glaucoma: revisiting with spectral domain optical coherence tomography. Application of the ISNT Rule to Neuretinal Rim Thickness Determined Using Cirrus HD Optical Coherence Tomography.

Application of the ISNT Rule to Neuretinal Rim Thickness Determined Using Cirrus HD Optical Coherence Tomography. Does the ISNT Rule Apply to the Retinal Nerve Fiber Layer?
Hwang YH, Kim YY. J. Glaucoma.

Spectral domain optical coherence tomography in children operated for primary congenital glaucoma. Novel use of 3T MRI in assessment of optic nerve volume in glaucoma. Correlation between lateral geniculate nucleus atrophy and damage to the optic disc in glaucoma.

Application of the ISNT Rule to Neuretinal Rim Thickness Determined Using Cirrus HD Optical Coherence Tomography. Does the ISNT Rule Apply to the Retinal Nerve Fiber Layer?
Pradhan ZS, Braganza A, Abraham LM. J. Glaucoma.

Novel use of 3T MRI in assessment of optic nerve volume in glaucoma. Correlation between lateral geniculate nucleus atrophy and damage to the optic disc in glaucoma.

in northern Sweden.

Long-term effects of multiple intravitreal antivascular endothelial growth factor injections on intraocular pressure.

Intraocular pressure in eyes receiving monthly ranibizumab in 2 pivotal age-related macular degeneration clinical trials.

Does intravitreal injections of bevacizumab for age-related macular degeneration affect long-term intraocular pressure?

Kim D, Nam WH, Kim HK, Yi K. J. Glaucoma.

Pharmacologic intraocular pressure lowering

Effects of K-115, a rho-kinase inhibitor, on aqueous humor dynamics in rabbits.

IOP-lowering effect of isoquinoline-5-sulfonamide compounds in ocular normotensive monkeys.

Phase 1 clinical trials of a selective Rho kinase inhibitor, K-115.

Phase 2 randomized clinical study of a Rho kinase inhibitor, K-115, in primary open-angle glaucoma and ocular hypertension.

Double-masked, Randomized, Dose-Response Study of AR-13324 versus Latanoprost in Patients with Elevated Intraocular Pressure.

The Efficacy of a Latanoprost/Timolol Fixed Combination Versus Latanoprost and Timolol Gel-forming Solution Unfixed Combination on Daytime Intraocular Pressure.

The Efficacy of a Latanoprost/Timolol Fixed Combination Versus Latanoprost and Timolol Gel-forming Solution Unfixed Combination on Daytime Intraocular Pressure.

Ozyol E, Ozyol P. J. Glaucoma.
