Supplementary Figure 1. All-pooled meta-analysis comparing 5-year overall survival between LG and OG.

In total, 3,210 and 3,794 patients were analyzed in the LG and OG groups, respectively.

The overall result was OR=2.10, 95% CI 1.86, 2.38 (p<0.01).

There was a significant difference in the between-study heterogeneity (p<0.01).
