**FIGURE S1.** Funnel plots for publication bias with studies concerning disease prognosis. These are scatter plots for the studies with cirrhosis (A) and the studies with hepatic death and/or liver transplantation (B) as prognostic outcomes.

**FIGURE S2.** Funnel plots for publication bias with studies concerning treatment responses. These are scatter plots for the studies with remission (A) and the studies with relapse (B).

**FIGURE S3.** Funnel plots for publication bias with studies concerning HLA associations. These are scatter plots for the studies with HLA DR3 (A) and the studies with HLA DR4 (B) typing.
**Figure S1**

(A) SE(log[OR]) vs. OR

(B) SE(log[OR]) vs. OR, with data points for hepatic death (diamonds), hepatic death or liver transplant (triangles), liver transplant (squares), lower CI (dashed line), upper CI (dashed line), and pooled (solid line).
