Errata

In the August 2003 issue of the *Journal of Pediatric Gastroenterology and Nutrition*, (2003;37(2):187–91), the figures printed with the article “Plasma Markers of Platelet Activation in Cystic Fibrosis Liver and Lung Disease” by Schwarz et al were incorrect. The correct figures are printed below with their appropriate legends. We sincerely regret the error.

Reference
FIG. 1. Plasma transforming growth factor beta 1 values in various groups of cystic fibrosis patients and healthy controls. CFLD = cystic fibrosis liver disease; CFNLD = cystic fibrosis patients without obvious liver or pulmonary disease; CFPD = cystic fibrosis patients with advanced pulmonary disease.

FIG. 2. Plasma platelet factor 4 values in various groups of cystic fibrosis patients and healthy controls. CFLD = cystic fibrosis liver disease; CFNLD = cystic fibrosis patients without obvious liver or pulmonary disease; CFPD = cystic fibrosis patients with advanced pulmonary disease.

FIG 3. Correlation between plasma platelet factor 4 and transforming growth factor beta 1 values for the entire group of cystic fibrosis patients and healthy controls.
