BIBLIOGRAPHY

1880

1881
2. Specimens of mechanical mycosis, biological mycosis, and a common form of organisms found in discharges from wounds. *Proceedings of the Royal Medical and Chirurgical Society of London* 9: 167-9. (summary; see 8 for similar summary)

1882

8. Specimens of bacilli. *British Medical Journal* 1: 778. (summary [Royal Medical and Chirurgical Society of London]; see 2 for similar summary)

1883
9. Adeno-sarcoma of testis, and secondary growths in the viscera, occurring in a case of cardiac malformation. *British Medical Journal* 1: 768-9. (summary and discussion [Pathological Society of London]; see 11 for complete article; see 10 for similar summary)

10. Adeno-sarcoma of testicle and abdominal viscera. *Lancet* 1: 683-4. (summary and discussion [Pathological Society of London]; see 11 for complete article; see 9 for similar summary)

13. Four cases of injury to the brain in man, illustrating very exactly the position of the cortical motor centres. *Journal of Physiology of London* 4: 5-6. (summary [Physiological Society of London])

1884

17. Case of occipital encephalocele in which a correct diagnosis was obtained by means of the induced current. *Brain* 7: 228-43.

20. On the existence of sensory nerves and nerve-endings in nerve-trunks, true “nervi nervorum.” *Proceedings of the Physiological Society of London* 36: 17-8. (summary; see 22 for similar summary; see 23 for abstract)

22. Preliminary communication on the existence of sensory nerves in nerve-trunks, true “nervi nervorum.” *British Medical Journal* 1: 166, 250. (summary [Royal Medical and Chirurgical Society of London]; see 20 for similar summary; see 23 for abstract)

23. Preliminary communication on the existence of sensory nerves and nerve endings in nerve trunks, true “nervi nervorum.” *Proceedings of the Royal Medical and Chirurgical Society of London* 1: 196-8. (abstract; see 20 and 22 for summaries)

28. with Edward. A. Schäfer (1). On the functions of the marginal convolution. *British Medical Journal* 2: 735. (summary [British Association for the Advancement of Science in Montreal]; see 27 for complete preliminary article; see 45, 70 and 107 [86 for summary] for later articles)

29. Septic diseases. *North London (Hospital)*, 128-37. (NA)

30. Stone in bladder. *North London (Hospital)*, 90-5. (NA)

31. Strangulated hernia. *North London (Hospital)*, 120-3. (NA)

32. Strictures of urethra. *North London (Hospital)*, 96-119. (NA)

34. The thyroid gland; its relation to the pathology of myxoedema and cretinism. *Lancet* 2: 1133-4. (summary [lectures I and II of the Brown Lectures on Pathology for 1884 at the University of London]; see 47 for complete article; see 35 for similar summary; see 44 for correspondence)

35. The thyroid gland: Its relation to the pathology of myxoedema and cretinism, to the question of the surgical treatment of goitre, and to the general nutrition of the body. *Medical Times and Gazette* 2: 847-50. (summary [lectures I and II of the Brown Lectures on Pathology for 1884 at the University of London]; see 47 for complete article; see 34 for similar summary; see 44 for correspondence)

36. Traumatic fever. *Lancet* 2: 1134-5. (summary [lecture III of the Brown Lectures on Pathology for 1884 at the University of London]; see 48 for complete article)

37. Tumours. *North London (Hospital)*, 58-89. (NA)

1885

40. Discussion on papers by A. Hughes Bennett (Case of cerebral tumour) and Rickman J. Godlee (The surgical treatment). *British Medical Journal* 1: 989. (discussion [Royal
41. The motor centres of the brain and the mechanisms of the will. *Nature* 32: 377-81. (address [Royal Institution of Great Britain]; see 42 and 43 for identical articles)

42. The motor centres of the brain and the mechanisms of the will. *Notices of the Proceedings of the Royal Institution of Great Britain* 11: 250-62. (see 41 and 43 for identical articles)

43. The motor centres of the brain and the mechanisms of the will. *Popular Sciences Monthly* 28: 100-12. (address [Royal Institution of Great Britain]; see 41 and 42 for identical articles)

44. Myxoedema. *British Medical Journal* 1: 302. (correspondence of 47; see 34 and 35 for summaries)

46. Sur la fonction de la glande thyroide (On the function of the thyroid gland). *Comptes rendus des séances de la Société de biologie et de ses filiales* 8 (suppl 2): 762-3. (in French; see 21 for previous article; see 61 for later article)

47. The thyroid gland: Its relation to the pathology of myxoedema and cretinism, to the question of the surgical treatment of goitre, and to the general nutrition of the body. *British Medical Journal* 1: 111-5, 211-3. (lectures I and II [Brown Lectures on Pathology for 1884 at the University of London]; see 34 and 35 for summaries; see 44 for correspondence)

1886

49. Advances in the surgery of the central nervous system. *Lancet* 2: 346-7. (summary [British Medical Association]; see 51 for complete article)

50. with Charles E. Beevor (1). A minute analysis (experimental) of the various movements produced by stimulating in the monkey different regions of the cortical centre for the upper limb, as defined by Professor Ferrier. *Proceedings of the Royal Society of London* 40: 475-6. (abstract of 76; see 77 and 111 for French articles; see 87 [75 for abstract] and 186 [174 for summary] for later articles)

52. Canine chorea. *Lancet* 1: 54-6. (summary [lectures IV and V of the Brown Lectures on Pathology for 1885 at the University of London])

54. A case of suppuration in the mastoid cells complicated by thrombosis in the right lateral sinus, and septic embolism of the heart and left lung, in which recovery followed trephining of the mastoid process, etc.; with remarks on the prevention of septic embolism in such cases. *Medical Press and Circular* 92 (ns 41): 495-6. (summary [Clinical Society of London]; see 55 for complete article; see 73 for similar summary)

55. A case of suppuration of the mastoid cells complicated by thrombosis in the right lateral sinus with septic embolism of the heart and left lung, in which recovery followed trephining of the mastoid process, etc., with remarks on the prevention of septic embolism in such cases. *Transactions of the Clinical Society of London* 19: 290-5. (see 54 and 73 for summaries)

56. Demonstration of photographs of epileptic guinea-pigs, with remarks. *Proceedings of the Medical Society of London* 10: 86. (summary; see 66 for identical summary; see 58 for similar summary)

58. Epileptic guinea-pigs. *Lancet* 2: 975-6. (summary [Medical Society of London]; see 56 and 66 for similar summaries)

59. Functional nervous disorders due to loss of thyroid gland and pituitary body. *Lancet* 1: 5. (summary [lecture III of the Brown Lectures on Pathology for 1885 at the University of London])

60. A further and final criticism of Prof. Schiff’s experimental demonstration of the relation which he believes to exist between the posterior columns of the spinal cord and the excitable area of the cortex. *Brain* 9: 311-29. (see 67 for previous article; see 63 for previous correspondence)

see 124 for later correspondence)

63. Mr. Horsley’s criticism on Prof. Schiff. *Lancet* 1: 227, 470-1. (previous correspondence of 60 and 67)

64. Modern pathology of the central nervous system. *Lancet* 1: 4-5. (summary [lecture II of the Brown Lectures on Pathology for 1885 at the University of London])

66. Production of epilepsy in guinea-pigs. *British Medical Journal* 2: 976-7. (summary [Medical Society of London]; see 56 for identical summary; see 58 for similar summary)

67. On the relation between the posterior columns of the spinal cord and the excito-motor area of the cortex, with especial reference to Prof. Schiff’s views on the subject. *Brain* 9: 42-62. (see 60 for later article; see 63 for previous correspondence)

68. Relation of the thyroid gland to general nutrition. *Lancet* 1: 3-4. (summary [lecture I of the Brown Lectures on Pathology for 1885 at the University of London])

69. Report to the committee of the Brown Institution for the year 1885. London: Univ. of London. (NA)

70. with Edward. A. Schäfer. Experiments on the character of the muscular contractions which are evoked by excitation of the various parts of the motor tract. *Journal of Physiology of London* 7: 96-110. (see 27 [28 for summary] and 45 for previous articles; see 107 for later article [86 for summary])

71. with Felix Semon (1). On an apparently peripheral and differential action of ether upon the laryngeal muscles. *British Medical Journal* 2: 405-7, 445-7. (address [British Medical Association])

73. Suppuration in mastoid cells, with thrombosis of lateral sinus and septic embolism. *Lancet* 1: 1069. (summary [Clinical Society of London]; see 55 for complete article; see 54 for similar summary)

1887
75. with Charles E. Beevor (1). A further minute analysis, by electrical stimulation, of the so-called motor region of the cortex cerebri in the monkey (*Macacus sinicus*). *Proceedings of the Royal Society of London* 43: 86-8. (abstract of 87; see 76 [50 for abstract], 77 [French] and 111 [French] for previous articles; see 186 for later article [174 for summary])

76. with Charles E. Beevor (1). A minute analysis (experimental) of the various movements produced by stimulating in the monkey different regions of the cortical centre for the upper limb, as defined by Professor Ferrier. *Philosophical Transactions of the Royal Society of London, series B* 178: 153-67. (see 50 for abstract; see 77 and 111 for similar French articles; see 87 [75 for abstract] and 186 [174 for summary] for later articles)

77. with Charles E. Beevor (1). Recherches expérimentales sur l’écorce cérébrale des singes; *Macacus sinicus* (Experimental research on the cerebral cortex of monkeys; *Macacus sinicus*). *Comptes rendus des séances de la Société de biologie et de ses filiales* 8 (suppl 4): 647-52. (in French; see 111 for identical French article; see 76 for similar English article [50 for abstract]; see 87 [75 for abstract] and 186 [174 for summary] for later articles)

78. Brain surgery in the stone age. *British Medical Journal* 1: 582. (summary [Royal Institution of Great Britain])

80. Neuralgia of the fifth nerve. *British Medical Journal* 2: 180. (summary [Odontological Society of Great Britain]; see 82 and 83 for complete articles)

82. Notes on the pathology of inveterate neuralgia of the fifth nerve, illustrated by cases treated successfully by avulsion of the nerve close to the skull. *British Journal of Dental Science* 30: 964-8, 1011-5. (address [Odontological Society of Great Britain]; see 83 for identical article; see 80 for summary)

83. Notes on the pathology of inveterate neuralgia of the fifth nerve, illustrated by cases treated successfully by avulsion of the nerve close to the skull. *Transactions of the Odontological Society of Great Britain* 19: 270-85. (see 82 for identical article; see 80 for summary)

84. Remarks on ten consecutive cases of operations upon the brain and cranial cavity, to illustrate the details and safety of the method employed. *British Medical Journal* 1: 863-5. (see 85 for French summary)
85. Remarques sur dix cas d’opération pratiqués sur le crâne et le cerveau (Remarks on ten consecutive cases of operations upon the brain and cranial cavity). *Progrès Médical* 2 (suppl 6): 79-82. (French summary of 84)

86. with Edward A. Schäfer. A record of experiments upon the functions of the cerebral cortex. *Proceedings of the Royal Society of London* 42: 111. (summary of 107; see 27 [28 for summary], 45 and 70 for previous articles)

1888

87. with Charles E. Beevor (1). A further minute analysis by electric stimulation of the so-called motor region of the cortex cerebri in the monkey (*Macacus sinicus*). *Philosophical Transactions of the Royal Society of London, series B* 179: 205-56. (see 75 for abstract; see 76 [50 for abstract], 77 [French] and 111 [French] for previous articles; see 186 for later article [174 for summary])

88. with Charles E. Beevor (1). Note on some of the motor functions of certain cranial nerves (v, vii, ix, x, xi, xii), and of the three first cervical nerves, in the monkey (*Macacus sinicus*). *Proceedings of the Royal Society of London* 44: 269-77. (see 89 for similar article)

89. with Charles E. Beevor (1). Report on some of the motor functions of certain cranial nerves (v, vii, ix, x, xi, xii), and of the three first cervical nerves, in the monkey (*Macacus sinicus*). *British Medical Journal* 2: 220-2. (see 88 for similar article)

90. with J. S. Bristowe (1). A case of paralytic rabies. *Lancet* 2: 966. (summary and discussion [Clinical Society of London]; see 91 for complete article; see 92 for similar summary)

92. with J. S. Bristowe (1). Paralytic rabies. *British Medical Journal* 2: 1110-1. (summary and discussion [Clinical Society of London]; see 91 for complete article; see 90 for similar summary)

93. Case of cerebral abscess successfully treated by operation. *British Medical Journal* 1: 636-7. (address [Medical Society of London]; see 94 for identical article; see 97 for German version; see 98 for summary; see 99 for discussion; see *British Medical Journal*, p. 530-1 for first half of article by Ferrier)

94. Case of cerebral abscess successfully treated by operation. *Proceedings of the Medical Society of London* 11: 232-6. (see 93 for identical article; see 97 for German version; see 98 for summary; see 99 for discussion; see *British Medical Journal*, p. 530-1 for first half of article by Ferrier)
A case of thrombosis of the longitudinal sinus, together with the anterior frontal vein, causing localised foci of haemorrhage, which produced remarkably localised cortical epilepsy. *Brain* 11: 102-6.

with Alexander C. Cope (1). *Reports on the Outbreak of Rabies among Deer in Richmond Park during the Years 1886-7*. London: Eyre & Spottiswoode. (NA)
