

Supplemental Table 2. Proportion of physicians in the entire cohort without an action against their licenses as a function of the number of years since beginning of training, including upper and lower 95% confidence intervals (CI). Calculated is the slope of the Kaplan-Meier curve at 5 year intervals.

Years since beginning of training	% of physicians without a license action	Lower 95% CI	Upper 95% CI	Kaplan-Meier slope/5 years
5	99.1%	99.0%	99.2%	0.9%
10	97.9%	97.8%	98.1%	1.2%
15	96.7%	96.5%	96.9%	1.2%
20	95.2%	95.0%	95.4%	1.5%
25	94.1%	93.9%	94.4%	1.1%
30	92.9%	92.6%	93.2%	1.2%
35	91.8%	91.3%	92.3%	1.1%
40	90.8%	90.0%	91.7%	0.9%
