

Supplemental Table 3. Cumulative incidence of license actions related to substance use according to demographic, certification and training characteristics, 1977-May 2014.

	Cases related to substance use (n = 530)	Persons (n=49,278)	Person-years	Incidence rate of cases related to substance use (per 1,000 person-years)
<i>Sex</i>				
Female	53	12,818	190,706	0.28
Male	473	36,381	658,232	0.72
Unspecified	4	79	1,556	2.57
<i>Medical School Country</i>				
American	473	38,242	658,088	0.72
International	47	10,921	189,647	0.25
Unspecified	10	115	2,759	3.62
<i>ABA Certified</i>				
Yes	326	41,923	730,946	0.45
No	204	7,355	119,548	1.71
<i>Primary Exam Results</i>				
Passed both on first attempt	178	28,300	439,532	0.40
Passed both, multiple attempts for Part 2	38	5,026	91,473	0.42
Passed both, multiple attempts for Part 1	61	5,371	119,265	0.51
Passed both, multiple attempts for both	34	2,991	72,663	0.47
Passed Part 1 only	28	1,842	22,601	1.24
Passed neither	74	3,036	62,223	1.19
Did not finish training	117	2,712	42,737	2.74
<i>Residency Training Performance</i>				
No unsatisfactory report	52	19,509	164,310	0.32
At least one unsatisfactory report	31	2,118	14,230	2.18
Not available	447	27,651	671,954	0.67
