Supplemental Figure 1. The expression of LXRα in lumbar 5 DRG after spared nerve injury.

A: The expression LXRα was upregulated after spared nerve injury. B: LXRα was expressed in both Neurofilament protein 200 (NF-200) and Isolectin B4 (IB4) labeled neurons, but not in GFAP labeled satellite cells 7 days after spared nerve injury. *p < 0.05, **p < 0.01, ***p < 0.001 versus sham group. Bar = 100μm. LXRα = Liver X receptor α; NF-200 = Neurofilament protein 200; IB4 = Isolectin B4; GFAP = glial fibrillary acidic protein.
