

### Supplementary Figures S1 Difference between the mean daytime mean arterial pressure and the mean nighttime mean arterial pressure

Histogram showing the frequency (n; y-axis; n total = 370) of the difference between the mean daytime mean arterial pressure (MAP) and the mean nighttime MAP. The median difference (25<sup>th</sup> to 75<sup>th</sup> percentile range) was +16 (+10 to +22) mmHg. The dotted vertical line represents the median difference.
