Appendix II

Figure 1. Bubble plot showing the mean difference in intraoperative fresh-frozen plasma requirement (units) versus proportion of cystic fibrosis.

Figure 2. Bubble plot showing the mean difference in intraoperative fresh-frozen plasma requirement (units) versus lung allocation score at transplant.

Figure 3. Bubble plot showing the mean difference in intraoperative platelets requirement (units) versus proportion of chronic obstructive pulmonary disease.
Figure 4. Bubble plot showing the mean difference in the duration of ventilator support (days) versus proportion of male.

Figure 5. Bubble plot showing the mean difference of the duration of ventilator support (days) versus proportion of idiopathic pulmonary fibrosis.

Figure 6. Bubble plot showing the mean difference in the duration of ventilator support (days) versus the year that the ECMO was implemented in the study.
