Supplementary Table 2: Study flow chart showing number of participants enrolled

* Exclusions from ITT analysis: Two subjects no blood draw during visit 1 and visit 2 respectively in the rMenB group. Ten subjects in the control group had no blood drawn at Visit 3.

** 3 Parents withdrew consent, and one participant was identified as having developmental delay (pre-dating 1st immunisation, but not detected at enrolment) and was withdrawn at the investigator’s discretion.

All enrolled subjects (n=71) were included in the safety analyses.
