MEF Cultures Results from All "Severe" AOM Episodes, by Otopathogen, by PCV Status.
PCV, pneumococcal conjugate vaccine, MEF, middle ear fluid, Mc, Moraxella catarrhalis, NTHi, Non-typeable Haemophilus influenzae, Sp, Streptococcus pneumoniae
Asterisk (*) notes significant reduction of positive S. pneumoniae positive MEF cultures in PCV13 immunized children (15%), when compared with unimmunized children (23%) or PCV7 immunized children (26%), p=0.05 and p=0.04, respectively.
