Figure 2. Cohort flow diagram

- Screened N=335
- Enrolled N=326
- Included in the analysis N=304 (85.4%)
- Confirmed TB, n=51 (16.8%)
  - Confirmed on study specimens, n=44 (86.3%)
  - Confirmed on other specimens, n=7 (13.7%)
- Unconfirmed TB, n=97 (31.9%)
- Unlikely TB, n=156 (51.3%)
  - Correspond to the maximum diagnostic yield for the pooling strategy
- No specimens collected on 2nd day, n=19
- Only 1 specimen collected on day 2, n=2
- Died before any specimens collected, n=1
- No consent, n=4
- Not eligible, n=5
