Supplemental Figure 2. Change from baseline in Personal and Social Performance total score during the 25-week open-label PP1M treatment phase.\textsuperscript{*,†}

CI, confidence interval; LOCF, last observation carried forward; PP1M, once-monthly paliperidone palmitate; PSP, Personal and Social Performance scale.

\textsuperscript{*}P < 0.001 for change from baseline to endpoint.

\textsuperscript{†}Values are the mean (95% confidence interval).

The horizontal line indicates stabilization criteria.
