Table 1  
**Detailed Pre-operative Equipment List**

Patient Position: Lateral decubitus (for posterior approach), axillary roll  
Table: Radiolucent Jackson table  
Positioners: Stulberg hip positioners (single pad posteriorly, double pad anteriorly)  
C-arm  
Bovie: 50/50  
Aquamantys  
Cell saver  

Retractors/Special Equipment:  
- Self-retainer x2; Hohmann x2  
- Adson Beckman retractor x2  
- Hibbs x2  
- Cobb elevator  
- Charnley retractor (shallow and deep blades)  
- Acetabular retractors  
- Double footed proximal femoral retractor x2  
- Flexible osteotomes  
- High speed burr (Pencil tip)  
- K-wires  
- Pointed reduction clamps (Small, medium, and large)  
- Culture swabs/specimen containers  
- Femoral canal reamers  

Implants:  
- Revision stem (i.e. diaphyseal fitting)  
- Cluster vs multi-hole acetabular shell  
- Elevated lip acetabular liners  
- Distal femoral variable angle locking plate  
- Dall Miles cables (including tensioners and small/large passers)
