Supplemental Figure 1

The scatter plot illustrates the relationship between the weighted mean dose of methotrexate and the weighted mean dose of 6-mercaptopurine. The x-axis represents the weighted mean dose of 6-mercaptopurine (mg/m.sq./day), while the y-axis shows the weighted mean dose of methotrexate (mg/m.sq./week). The data points are distributed across the graph, indicating a correlation between the two doses.
