Appendix C. This SRQ clinician module visual dashboard display for a de-identified patient shows key PRO measures (line graphs, top), visit types (symbols, center row, e.g. “B”), and medications (color-coded lines by drug type/name, bottom rows). Data is displayed longitudinally from left to right by encounter/contact date (shown here is the time period from June 5, 2014 to June 4, 2016).
