1:20 (20-40u) 1:40 (40-60u) 1:80 (60-80u) 1:160 (>80u)
Supplementary Figure 1: Level of Autoantibody Positivity. Shown here are the number of subjects who tested positive for an autoantibody at the various levels of detection. ANA and ASMA were measured based on titers (1:x) and ASMA (beginning in January 2013) and LKM were measured based on units (u.).
