Title

2  The words "case report" should be in the title along with the area of focus.

3  Background: What does this case report add to the medical literature?

3a  Case summary: Give or summarise the diagnoses, interventions and outcomes discussed.

3b  Conclusion: What is the main "take-away" lesson from this case?

4  The current standard of care and contributions of this case—With references (1-2 paragraphs)

5  Information from this case report organized into a timeline (table or figure)

6a  Physical exam

6b  Diagnosis

6c  Assessment

6d  Interventions

7  Relevant physical examination findings

8a  Evaluations such as surveys, laboratory testing, imaging, etc

8b  Diagnostic reasoning including other diagnoses considered and challenges

8c  Clinical or other findings leading to the diagnosis

9a  Type such as the style of recognizability, treatment, medications, surgery

9b  Note changes in information with explanation

10a  Relevance of information such as doseage, frequency and duration

10b  Relevance in information with explanation

10c  Note changes in information with explanation

11a  Other current interventions

11b  Proposed characteristics where applicable

11c  Consider other factors including assessment, diagnoses and interventions

12  Travels such as style recognizability, treatemnts, medications, surgery

12a  Note changes in information with explanation

12b  Note changes in information with explanation

13  Informed consent from the person who is the subject of this case report is required by most journals

14  Acquiescence section: Competing interests: If approval is required
