Unconventional perfusion flap models in different animal species

- Average flap survival area (%)
- Optimized experimental models (%)
- Type IA AVF (%)
- Type IB AVF (%)
- Type IIA AVF (%)
- Type IIB AVF (%)
- Type III AVF (%)
- Pedicled AVFs (%)
- Free venous flow through (%)
- Distally pedicled based VF (%)
- Proximally pedicled VF (%)
- Sliding VF (%)

- Rabbit
- Rat
- Pig
- Dog

- Flap includes bone or cartilage (%)
- Fasciocutaneous flaps (%)
- Innervated flaps (%)
- Delayed flap (%)
- Well vascularized wound bed (%)
- UPFs performed on the hindlimb (%)
- UPFs performed on the forelimb (%)
- UPFs performed on the ear (%)
- UPFs performed on the dorsum (%)
- UPFs performed on the thorax and abdomen (%)
- UPFs performed on the abdomen and/or groin (%)
