Figure 1A: This figure shows CMV viral monitoring for transplanted patients. Briefly, no patients developed CMV viremia by PCR out to 12M posttransplant.
**Figure 1B:** This figure shows Polyoma BK viral monitoring posttransplant. One patient (TCZ07) developed polyoma BK viremia at 3M and 6M posttransplant. This patient did not have BKAN on 6M protocol biopsy.

*TCZ07: Lost to follow up*
