C, Figure 1. Selection of study subjects in primary living donor adult kidney transplant recipients.

Assessed for eligibility (n=19,656)

Excluded (n=5,631)
- Age < 18 years
- Previous solid organ transplantation
- Multi-organ transplantation
- HBsAg-positive
- HIV-positive
- HCV sero-status unknown

Eligible (n=14,025)

HCV-positive (n=364)

HCV-negative (n=13,661)

PS-matching

HCV-positive (n=335)

HCV-negative (n=335)
SDC, Figure 2. Survival of kidney transplant recipients with HCV infection stratified by donor HCV status. A, Patient survival. B, Graft survival.
B

Graph showing graft survival outcomes stratified by donor HCV status. A, Patient survival. B, Graft survival.
