Figure S2. Study Design

Earliest available data:
- NARP/SARP: 2001
- Alberta Health: 1994

Accrual period:
- May 2002-March 2013

End of study:
- March 31, 2015

3-year look-back window for baseline comorbidities:
- Earliest May 1999

Observation window:
- Index eGFR: Mean values for serum creatinine values within a 3-month look-forward window
- Index albuminuria: Median values for albuminuria within a 3-month look-back and look-forward window

Date of transplant

1-year post-transplant date (index date, start date of follow-up)

Abbreviations: eGFR, estimated glomerular filtration rate; NARP/SARP, Northern and Southern Alberta Renal Program.
