

Supp Fig 2

**Figure S2.** Analysis of T regulatory cells. The T helper gate (CD4<sup>+</sup> Gate) was identified as FSC<sup>low</sup>SSC<sup>low</sup> CD45<sup>+</sup> CD4<sup>+</sup>. The Tregs were selected as CD25<sup>high</sup>Foxp3<sup>+</sup> and CD127<sup>-/low</sup>CD25<sup>+</sup>Foxp3<sup>+</sup> within Th gate. The correlation of old (CD25<sup>high</sup> and Foxp3<sup>+</sup>) and new markers (CD25<sup>+</sup>CD127<sup>low/-</sup>-Foxp3<sup>+</sup>) markers used to define Treg cells is depicted.
